FEATURE

■ XP15 B: A-B-C-...-A Loop with manual loading and unloading

XP15 B transports pallets along the loop continuously and workers are allowed to load or unload goods manually on the way. Pause on pre-programmed work stations.

■ XP15 B+: A-B-A with automatic unloading

XP15-B+ starts with manual loading and unloads pallets automatically in the storage area or production. It requires minimum involvement of worker and delivers high process efficiency where transportation tasks need to be repeated permanently.
